Dear Nino

G-I-N endorsement of GIMBE research project

Thank you for your letter outlining the planned project in Italy to measure all Italian guidelines against the G-I-N standards for clinical practice guidelines.

It gives me great pleasure to confirm endorsement of this project by the G-I-N board, which was very enthusiastic to learn of the proposed work.

We will very much look forward to hearing of the final results of the project and hope that you find positive evidence of high standards within the Italian clinical practice guidelines. We would be delighted to highlight this work to our members, perhaps in a newsletter article, if you would like to write this at an appropriate time.

In addition, G-I-N highly appreciates all the efforts GIMBE is making in Italy to further the adoption of the G-I-N standards.

We wish you a successful project and a fruitful initiative to promote quality management for clinical practice guidelines.

With warm regards

Ina B Kopp
